1,944

USING ALL OUR TOOLS TO GET BACK TO THE NEW NORMAL

Wash your hands frequently with soap & water or alcohol-based hand rub for at least 30-40 seconds.

Cover your cough or sneeze with your elbow or a clean tissue. Wash your hands after and dispose used tissue.

Wear a mask. When appropriate, wear a mask to lower your risk of getting or spreading COVID-19.

Avoid touching your face. Wash your hands before and after you touch your face even if you're wearing a mask.

Avoid crowded places and keep a distance of at least 3-6 feet from other people when in public places. Isolate yourself if you are sick and call the Belau National Hospital for advice.

Clean objects and surfaces that you touch often. Use bleach or alcohol-based disinfectant.

Get vaccinated. Getting vaccinated will help protect you from getting COVID-19.
